

Windows 10 bootrec /fixboot access is denied

If you do have the Installation Media :

1. Insert the Media (DVD/USB) in your PC and restart.
2. Boot from the media.
3. Select Repair Your Computer.
4. Select Troubleshoot.
5. Select Advanced Options.
6. Choose Command Prompt from the menu :
 1. Type and run the command :
diskpart
 2. Type and run the command :
sel disk 0
 3. Type and run the command :
list vol
7. Verify that the EFI partition (EPS - EFI System Partition) is using the FAT32 file system and assign a drive letter to it :
 1. Type and run the command :
sel vol <number of volume>
 2. Type and run the command :
assign letter=<drive letter>:
 3. Type and run the command :
Exit
8. The next step is the same across all the operating systems at this point :
 1. Type and run the command :
Format <drive letter>: /FS:FAT32
 2. Type and run the command :
bcdboot C:\windows /s <drive letter>: /f UEFI

Done.
